## The Complete Package...

Offering all the benefits of a GGF member

The N&C Glass range of roofline products will ensure that repainting becomes history. Not only will our range of soffits and fascias save you time they will also improve the kerbside appeal of your property and are available with suited guttering and downpipes.

## From start to finish N&C Glass ensures quality at every stage

N&C Glass ensure that the following procedures are followed.

- A full Health and Safety risk assessment working at heights.
- The use of proper access equipment (not just ladders) compliant with Health and Safety Regulations.
- Inspection of rafters/laths for rotten timbers and report findings.
- Set up fixing points at maximum centres; white 600m, foiled 400m.
- Make sure ventilation is sufficient.

### Fire Escape

The drain pipe that could save lives

Timber soffits and fascias need maintaining and over time will eventually need to be replaced – no matter how much effort has been made to maintain the quality of the timber; the rot will set in and cause damage to other parts of your property.

N&C Roofline Soffits and Fascias will eliminate all these problems. As long as the PVCu roofline products are attached to sound roof trusses they will last a lifetime – no rotting – no flaking, cracking or peeling – no colour loss. After fitting N&C roofline product you can rest assured that the ladders will not be needed to climb the gable end with a paint brush in hand again. We also use a concealed ventilation system for all our soffits which prevents the build up of moisture in the roof space without the need for unattractive slotted soffits.

All our roofline products are available in white, woodgrain or black finish. This is further enhanced by a range of decorative features and gables.

Bullnose

## No more painting

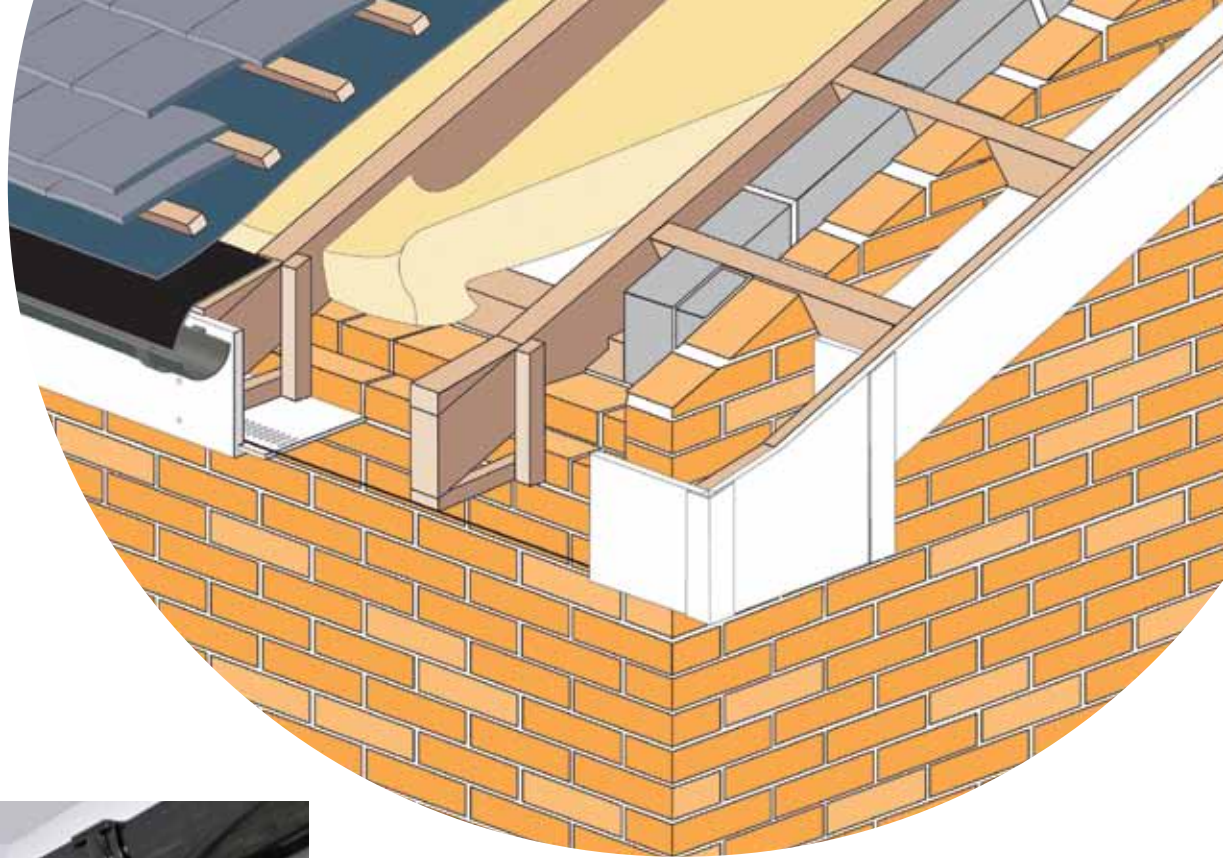

Fascias are available in three profiles – a simple bullnose, decorative profile or a square edge.

With all ancillary products such as end caps, corners and even guttering matching your chosen profile – the N&C Glass roofline range will transform your roofline for the lifetime of your property.

Roofline will not only add value but will also enhance the look of your property and provide a low maintenance selling point. Roofline is not only for the present but will help you sell your property if you choose to in the future.

### Roofline Guide

- Full removal and replacement of roofline – ABSOLUTELY NO OVER CLADDING
- Moving back the tiles – Allowing full inspection of roof timbers and removal of debris
- Replacement of visible rotten timber – To prevent future decay
- Re-aligning of rafter end / feet – To ensure the entire run of fascia is straight and level
- Use of 18mm thick, heavy fascia boards – Rigid and sturdy to prevent warping and cracking
- Concealed ventilation – Preventing the build up of moisture in the roof space.
- Eaves protection system – Which channels excess weather into guttering rather than house structure.
- Integrated 'Bird Comb' - A safe, yet effective barrier to birds nesting in the roof space
- On completion of the project all products are cleaned and polished, scaffolding promptly removed from site, site cleaned and all debris removed
- All backed by a full 10 Year guarantee

### Guttering and Fallpipes

Gutters are available in either half round, square or ogee decorative profile, with fallpipes either round or square. To ensure co-ordination with other roofline products they are available in black, white or brown.

Ogee gutter with square fallpipe

## The difference that cladding could make

Traditional timber cladding is renowned for being difficult and time consuming to maintain. If your property has external cladding you could be spending valuable leisure time sanding, cleaning and repainting the

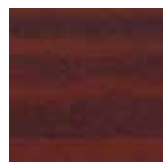

exterior of your property. Additionally old rendered buildings can benefit from a PVCu cladding system – no more re-rendering, painting and maintenance.

N&C Glass cladding systems are available in shiplap and open V styles with colour options. Combined with soffits and fascias your property could become virtually maintenance free giving you more time for relaxation.

## Hardie Plank® Siding

Hardie Plank Siding is the latest product to be offered by N&C Glass

## Hardie Plank® Siding

Hardie Plank Siding offers enormous advantages over conventional siding materials, with an unsurpassed ability to stand up to the elements. For its strength and durability, Hardie Plank Siding is the most economical solution for enhancing and protecting homes.

## Colour Plus Technology

Colour doesn't just makes a house stand out, it makes it distinctive. The factory-applied finish makes the installation more cost effective and the removable protective laminate prevents damage during installation.

## Backed up by James Hardie

10-year product and finish warranty from a reliable manufacturer.
