Conservatories, a comprehensive choice -
From sun lounges, Victorian, Edwardian, combination and bespoke.

Tailor-made conservatories to suit your style of house.

Take advantage of our professional design service, we take time to understand your individual requirements and needs - from initial concept through to completion

From start to finish N&C Glass ensures quality at every stage

Chosing the right design

A well designed conservatory should complement and enhance the look of existing architecture. We can simulate how the chosen design will look by the use of CAD software to help make your design come to life.

A conservatory will not only add value to your home but brings elegance and functionality by adding a new room in your garden.

Whatever your requirement, be it an extra lounge area, dining room, playroom or study the flexibility of our conservatory system will let you create your dream in a traditional or contemporary design, with a range of colours and materials to choose from.

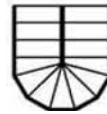

We will work with you to create your perfect design and then look after the planning, manufacture and installation of your new outdoor / indoor room.

The transformation

Finishes include white, rosewood and golden oak and clever combinations of wood effect exterior finishes with white interiors. PVCu makes your conservatory virtually maintenance free and very energy efficient.

The very latest materials and design innovations mean that your new conservatory retains the heat during the winter months but can remain pleasantly cool even at the height of summer.

Utilising the N&C Glass range of windows and doors the N&C conservatory system also incorporates a Roofing System to combine product innovation with traditional and elegant designs.

Key Features

- Wide range of decorative features
- Glass or insulated polycarbonate roof available
- Roof system manufactured from strong rigid aluminium components - capped with PVCu finish
- High security fixing details
- All roofs pre-fabricated and tested in the factory for smooth and trouble free installation.

Create your dream in your own design

Double Glazed Units

Energy rated DGU's are available for total comfort and are manufactured in house. These units are designed to increase solar heat gain and reduce heat loss through the windows. Energy Rated windows are certified as 'A' rated by the British Fenestration Ratings Council (BFRC).

The Choice

For a truly bespoke conservatory you have a choice of roof and glazing options to suit every taste and need. For roofing systems there is a choice of colour and heat retention /deflection. For the fanlights the choice is extensive with leaded, stained glass and bevelled double glazed units available.

Stained Glass

The all new Celcius Elite

N&C High performance glass

Heat Reflection 78%

Celcius Elite reflects approximately 3 times more solar energy than standard glass.

U-value .9%

U-value measures internal heat loss, the lower the number, the greater the insulation.

UV Protection 94%

Reduces the effect of harmful UV rays allowing greater protection of your furniture and fabrics.

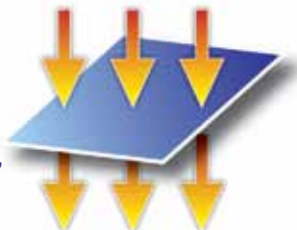

Easy Clean

The Easy Clean coating reduces the requirement for manual cleaning, as it enables water to run off the glass taking most of the dirt and grime with it.

Visible Light Transmission 34%

Celcius Elite softens the impact of natural light through the roof of your conservatory, for increased comfort.

Feel The difference

The amount of heat transmitted through standard glass is reduced with Celcius glass. It will amaze you!

The N&C conservatory range has achieved a host of quality and security accreditations for its product range. In addition to the accreditations the imagine range is also compliant with the following regulations:

Part A – Structure

Part B – Egress

Part F – Ventilation

Part J – Scotland Conservation

Part K – Protection from Collision

Part L – Conservation of Fuel & Power

Part M – Disabled Access

Part N – Safety Glass

Sustainability

All our PVCu profile is now extruded using a new calcium organic compound in place of conventional lead stabilisers.

The switch to calcium organic forms part of a holistic approach to environmental sustainability.

Under Floor heating

Available on all of our installations. Come and see our samples in our showroom.
